

The ULTIMATE Corporate Event Day! Could your team fly an airliner?

Prices from £999

Virtual Aerospace ultimate group events puts you, your friends or colleagues at the controls of a professional flight simulator used to train real world pilots.

Under the guidance of an experienced commercial pilot you will take to the virtual skies in an 80 ton, 500mph airliner, from take off to landing, you will only have minimal input from an your instructor, and so its all down to you!

This is the ultimate team challenge!

Virtual Aerospace Team Events

Nothing requires more planning, teamwork or clarity of communication than flying an airliner. Whether it's planning your route, reacting to a continually changing picture, or monitoring 80,000 pounds of thrust, anything less than perfect deployment of your skills could be disastrous! Similarly we appreciate the individuality, precision and planning that your corporate day needs and can offer a fully tailored event to meet your itinerary.

Come and join us at one of our 6 UK branches and try your hand at flying a state of the art Boeing 737 simulator or experience the thrill of piloting the only Vulcan bomber simulator in the world today (Manchester branch only). Virtual Aerospace corporate events service is the perfect way to reward your team, entertain clients or provide team building exercises. One thing we can guarantee is that nothing will get the heart pumping faster than taking the controls of an 80 ton, 550 mph airliner whilst attempting to land at some of the worlds most dangerous airports!

Virtual Aerospace events staff will work closely with you and your team to ensure your day runs smoothly, whether thats organising travel, hotels, meeting rooms or food. All of our training centres can accomodate your requirements. To add to the fun we like to run each session as a friendly competition, so whatever your needs might be, we are here to work closely with you to create the best experience possible!

A Typical Team Event Includes

WELCOME MEETING

- Meet the instructors at your pre flight briefing over coffee / tea.
- Team Allocation, teams can be made up of 2 or 3 person groups. Team Roles include Captain, First Officer and in the case of 3 person teams an Engineer / Navigator.

TRAINING & BRIEFING

- A chance for us to tell you a little bit about how an airliner flies before we let you loose on our multi million pound training machines.

Dont worry there's no test! The briefing covers the basics of the main controls, how not to fall out the sky and how not to get lost!

No previous flying experience is necessary neither do you need to be an xbox demon, its all pretty straight forward and most people even manage to land, often not on the runway but they do land!

THE FLIGHT

- With the basics under your belt its time to head for the simulators and put those skills to the test. Everybody gets a chance to fly the aircraft including taking off, general handling and landing. If you have chosen to have a friendly competition then no points are awarded for landing on the M25!

AWARDS & PRESENTATION

Each phase of your experience can be scored, with a de-brief and prize ceremony at the end of the day.

An event director can be on hand throughout the day to ensure your event runs smoothly.

About Virtual Aerospace

 We are the UK's largest flight simulator company and our fleet includes:-

4 fixed Base 737 Professional Training Sims
2 Full Motion Boeing 737 Sims
1 Airbus A320 Sim
1 x Vulcan Bomber!

 All of our instructors are fully qualified commercial pilots. Either full time instructors or current airline pilots.

 We have 6 locations depending upon packages required and numbers. Our centers include, Northampton, Manchester, Gloucester, Brighton, Cardiff and Burgess Hill. Conference and catering facilities can be arranged at locations.

 Refreshments and food will be available F.O.C. throughout the day and depending upon packages we can also arrange breakfast, meeting rooms, and hotel conferencing facilities on request.

FLIGHTSIMULATORS

Packages designed to suit you.

Full Motion Simulators

Prices from £2499 for half day or
£4750 for full day

Half Day = approx 4 hours simulator time.
Full day = approx 8 hours simulator time.

In addition you also receive training & briefings.

What is a full motion simulator?

Full motion simulators as the name suggests move in all directions. They stand 50 feet tall on massive hydraulic legs and are capable of pulling G-Force and recreating severe turbulence. Land heavily in one of these £15 million pound machines and everybody will know about it! These simulators are 100% accurate to the real aircraft in feel, look and response!

Fixed Base Simulators

Prices from £999 for half day or
£1950 for full day

Half Day = approx 4 hours simulator time
Full day = approx 8 hours simulator time

In addition you also receive training & briefings.

What is a fixed base simulator?

Fixed base simulators are 1 to 1 scale and accurate in everyway, the only difference to their £15 million pound cousins is they don't move. However using clever audio visual cueing most people wouldn't be able to tell. Whats more because there are no size and weight restrictions we have been able to build cabin sections that make entering them feel very real indeed!

Bespoke Packages & Extras

Most of our facilities are based at airports so if required we can also arrange for other flying based activities to be included at further cost, you can choose from some of the following:

Helicopter flights (Guide price approx £350 Per Hour) - Shoreham & Sywell only

Light aircraft flights (Guide price approx £190 Per Hour) - Shoreham, Gloucester & Sywell only

Vintage aircraft (Tiger Moth or Harvard) (Guide price approx £200 Per Hour) Shoreham Only

What our Customers think!

"Had a great day, made the hairs on the back of my neck stand up, could not get it into my head it was a simulator it was so realistic, would definitely recommend it to anyone and come again myself, fantastic experience"

Best Regards - Barrie Larner

"Personally I had a whale of a day and found the whole experience exhilarating. To see the whole team bond and bounce about their flying exploits was a pleasure to be hold and something I would recommend to others. In fact I would go as far and say even to days open to our customers for us to bring down and entertain. It was great and still smiling now. Thanks very much"

Kind Regards - Doug Woodberry

"I too would really like to thank you all at virtual aerospace & your wonderful hospitality, added to one of the most amazing experiences I have ever had (& I ride a Yamaha R1 too)

The whole day was magnificently organised, presented & executed perfectly, your guidance for us novices was just perfect also, which culminated if a very rounded fun team building day.

As you can tell, I am still buzzing from the whole experience, & thank you all kindly, once again, & I would happily recommend your business to anybody willing to listen & will"

Kindest Regards - Shaun Burton-Pye

The perfect mix of challenge, adrenalin and fun wrapped up in a professionally run, easy going day that will leave every member of your team exhilarated and wanting more!

As Seen &
Heard on

The Flight Simulators.

During the past 10 years flight simulators having been getting more and more realistic. Most people that remember the krypton factor would have been impressed at the level of realism 20 years ago, yet today these machines are so realistic a newly trained pilot can complete his entire training on just the flight simulator! That means he can go from flying a light 4 seat twin engined aircraft to having a license to fly a 200 seat, 550mph airliner without actually getting into the real aircraft, they are that real!

Although Virtual aerospace have only been training professional pilots since 2010 with 9 flight simulators and 35 commercial flight instructors we are now one of the largest simulators training facilities in the UK. We have trained pilots for many of the well known airlines including - Ryanair Easyjet - Jet 2 - BMI - Norwegian Air - Dubai Airways - Wizz - Monarch - British Airways and many more. You will probably have seen our simulators recently on TV as they are often used by Sky News & the BBC for documentaries and programs as well as appearing on numerous radio and TV shows.

There are many different types of simulator but the main ones are split into 2 categories:

Fixed Base
Full Motion

Fixed Base As the name suggests they don't actually move. This keeps manufacturing costs down to a minimum and thus the hourly rental prices are considerably lower than the full motion simulators, but as far as being in the cockpit is concerned, they are every bit as realistic as their larger more expensive cousins. However, don't for one moment think that this takes away from the experience. With 180 degree wrap around visuals, everybody is fooled into thinking that the simulator is actually moving. Your brain is tricked and we have had many people ask where the hydraulics that make them move are. As for the inside they are exactly the same as the real aircraft.

Full Motion Flight simulators cost in excess of 15 million pounds. These huge machines fill large rooms, weigh many tons and are 50 feet high! These machines feel exactly like the real aircraft, from feeling the bumps of the runway lights to being able to reproduce severe turbulence, thunderstorms and foggy weather conditions. Clever motion cueing will even reproduce acceleration and increased G-forces. These really are the ultimate thrill and today they are the closest that most people will ever come to feeling exactly what its like to fly a large transport aircraft.
